Prevue APS Pro
Applicant Tracking System

Easily Market Your Jobs & Collect Resumes - All in One Dashboard

Branded Career Site & Application

Your Prevue APS Pro Applicant Tracking System includes a branded career site that matches and integrates seamlessly with your exisiting website. Companies have full control of their application process - you pick the information you wish to collect. The application process is simple and intuitive, helping to reduce candidate abandonment.

Stay Organized

Say goodbye to using multiple spreadsheets to track your candidates and having your inbox flooded with applications. Find everything you need to see in one place: job applicants, screening question answers, pre-employment test scores, and much more. Stop wasting time searching for the information you want: it's all right where you need it.

Candidate Screening

The Prevue APS Pro comes loaded with robust screening features that help hiring managers reduce their time to hire. Scored screening questions help determine which candidates are the most qualified. Companies then harness the power of psychometrics with the Prevue Screen personality assessment, showing if a candidate is a good fit (green), possible fit (yellow) or doubtful fit (red).

Get Automated

Providing a great candidate experience is becoming increasingly important when attracting the best talent - but sending individual emails out to every applicant can prove to be time-cosuming and cumbersome. Interacting with your candidates has never been easier (or faster) than it is with the automated email features in the APS Pro.

Post Jobs Everywhere

Gone are the days of posting manually to different job boards. The system is connected to hundreds of the **top free and paid job boards** from around the world. After you've perfected your job advertisement, a simple click of a button posts it to the job boards that interest you — instantly.

Team Friendly

Unlimited logins means that you can involve everyone you need to include in the hiring process. Sharing candidate applications within your organization can be done at lightning speed. Pre-employment tests, interview notes and status updates can also be shared, or kept confidential—that's up to you.
