VALIDITY INTRODUCTION:

- The rules for identifying patterns of responses in the Personality Section of the Prevue Assessment which might be "invalid" include systematic, but non-meaningful response patterns, omissions and excessive use of the "B" answer option. Systematic, but non-meaningful response patterns occur when the distribution of the responses differ from the norm and are considered unusual. The omission rule occurs if more than three responses are omitted in a given scale, making the results appear more average than they are. The "B" answer rule is affected by the total number of "B" responses selected. The candidate had the choice of an "A", "B", or "C" for every question in the Personality Section of the Prevue Assessment. The second option, the "B" choice, is always an unsure or in-between answer.

VALIDITY COMMENTARY:

- The total number of "B" responses chosen by the candidate in the course of completing the Prevue Assessment Questionnaire, including questions that were not answered, was 19.
- This number of "B" choices is within acceptable levels and the results of the Personality section of this report had meaningful response patterns. Therefore the data presented in this Prevue Assessment can be considered accurate and reliable.

BEST PRACTICE RECOMMENDATIONS:

- **Assessment Administration:** Best practice protocol recommends that assessments be administered to candidates in a controlled environment under the supervision of a proctor to ensure that:
 - The person who completes the Assessment is in fact the candidate;
 - A candidate's responses to the Assessment questions are not affected by collusion with others or by other actions that would invalidate the Assessment;
 - The supervisor is able to address unexpected conditions or problems affecting a candidate and to provide reasonable accommodation for candidates where required;

Where an Assessment is administered without the recommended supervision, the accuracy of the report cannot be guaranteed. If the report is a significant consideration in any final selection or other high stakes decision, you might wish to have the candidate retake the Prevue Assessment in a controlled environment;

For more information on the administration of the Prevue Assessment, please see "Administering the Prevue Assessment" in the Prevue User Guide posted at www.prevueonline.com.

- **Assessment Weighting:** The weight given to the Prevue Assessment in any human resource selection or other high stakes decision should not exceed one-third of the total process. The remainder of the process, including the candidate's work history, interview, background checks, etc., should be considered in association with the results of this report.
- **Ensure Fairness:** When properly administered, the use of the Prevue Assessment will help to ensure that applicants are treated fairly without regard to race, colour, religion, sex or national origin. The Prevue Assessment was designed and developed to conform with the human rights legislative and best practice requirements prevailing in the various countries where the Prevue Assessment is distributed. This includes the EEOC Guidelines, the Americans for Disabilities Act and the standards for test development and administration published by the American Psychological Association, the British Psychological Society and the Association of Test Publishers.
